EQUINIX LONDON DATA CENTERS

Equinix helps companies accelerate business performance by connecting them to their customers and partners inside the world's most networked data centers. Our London data centers are business hubs for more than 1,000+ companies. London customers can choose from a broad range of network services from 200+ network service providers and they can interconnect directly to customers and partners in their digital supply chain. Our facilities feature a dense concentration of financial services, internet service providers, cloud and IT services, enterprises and content and digital media companies. The Equinix London metro International Business Exchange™ (IBX®) data centers are strategically located around central London and consist of seven buildings with approximately 680,000 square feet (63,000+ square meters) of colocation space.

The London colocation facilities enable customers to be part of a rich industry ecosystem. These data centers are located in prime locations near one of the world's most important financial centers, are served by excellent communications links and offer unrivaled access to more than 30 European markets and 80 exchanges.
